

WHY PURCHASE PRESERVED INTERIORS PRODUCTS? PRODUCTS?

10 REASONS WHY
ARCHITECTS,
DEVELOPERS AND
INTERIOR DESIGNERS
SPECIFY PRESERVED
INTERIORS

They Appear Identical to Living Plants

They are so realistic looking that you cannot tell the difference between preserved or live plants

They are easy to Install

On average for 2 preserved 15 foot interior palms, all is needed is 2 workers, a 12 foot ladder and about an hour and a half to install

They are ideal for low or no light locations

Designers can now expand their palette design in any location regardless of lighting levels, ventilation or irrigation systems

They are Virtually Carefree

No water, light, feeding, pruning ever needed, only the occasional dusting

Guarantee

Every Plant includes a 4 year guarantee from date of purchase and can last from 7 to 8 years or more

They are custom Built

We build according to your needs and specification from 4ft to 50 feet in height

They will never die

Unlike live plants or trees, preserved Interiors plants and trees will never die of disease

Considerable Cost Savings

When compared to the annual maintenance cost associated with live plants, Preserved Interiors provide potential savings in the short & long term

Preserved Interiors provides excellent value and quality on award winning product with prompt, professional service! Installations worldwide for over 20 years and we're ready to create custom items to match your visions! When needing to bring the organic beauty of nature to your projects indoors or even outdoors, the choice is clear, **Preserved Interiors** turns your floral and landscape visions into reality!

Inherently Fire Proof

All of our products include internal fire retardant backed by a Fire Marshall Certificate

Construction Factors

With Preserved Interiors, there is no need for drainage, floor load bearing capacity or special lighting
